

Emergency Parts List

Keeping an inventory of certain spare parts may help reduce the down time caused by parts failure. Items such as bulbs for overhead lights and curing units, gaskets for sterilisers, syringe and HVE parts are easily replaced and save down time if a spare is on hand. Below is a list of recommended spare parts for the equipment in your dental office. Please feel free to ask about the proper replacement procedures for these parts and any other preventive measures for your dental equipment.
