HARP TESTING DENTAL X-RAY MACHINES

The Healing Arts Radiation Protection (HARP) Act states that all dental X-ray machines must be tested annually for collimation, HVL and Patient Entrance exposure. **Varanidex Inc.** specializes in providing these services.

QUALIFICATIONS

Varanidex has been providing QC measurements to dentists in Ontario since 1986, and in that time has provided over 30,000 dental x-ray QC tests for both digital and traditional film-based radiography for Intra-oral, panoramic and cephalometric x-ray units.

COST

- **\$50.00 for 1 machine**
- **\$45.00 each for 2-3 machines**
- **\$40.00 each for 4 or more machines**

For your convenience, we remind you each year when testing is due.

CONSULTING:

We can assist in Ministry paperwork such as forms for new equipment and office moves, shielding calculations, compliance inventories etc.
